

THE Adviser

Best and Worst

Figures in the graph refer to past performance, which is not a reliable indicator of future results

AXA - Framlington UK Select Opportunities R – 9% over a 3 month period is exceptional. Further QE has boosted UK equities and Nigel Thomas has delivered an exceptional return on the back of this.

Premier - UK Money Market – when our worst performing 3 month fund is a cash fund (with a positive number) I cannot stop smiling. An excellent 3 month period for our portfolios.

The figures in the graph refer to past performance, which is not a reliable indicator of future results. The value of your investment and any income from it may go down as well as up. You may not get back the original amount you invested. Tax treatment is dependent upon individual circumstances and may be subject to change in the future. The 'Best and Worst' article is not intended to be an offer to buy and sell, or a solicitation of an offer to buy or sell and products or invest in certain funds. The figures shown are intended only to demonstrate performance history of the fund and take no account of product charges. Fund performance is based upon the movement of the daily price.
